Mr. T. Bhima Rao.

1. Read accounts of Municipal receipts and expenditure for the month of July 1888. As will be seen from the statement given below, there has been a net decrease of Rs. 50—10—4½ as compared with the realizations under "Octroi" for the same month last year. This is due to a fall in the imports owing to heavy rains.

| | Particulars. | July 1887. | | | July 1888. | | | More. | | | Less. | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | I. Octroi. | | | | | | | | | | | | |

| | Total.... | 284 | 11 | 5 | 234 | 1 | ½ | 7 | 3 | 0 | 57 | 13 | 4½ |

Net Decrease 50—10—4½.

2. Read Anche Bakshi's Yadi No. 33, dated 23rd July 1888, to the address of the Deputy Commissioner, Shimoga, stating that the Anche officials at Shimoga will be directed to vacate the present Anche office building for the use of the Municipal School if the building which is now used as Sayer Katte and which was formerly the Anche office were made over to them.

Resolved that the Sayer Katte cannot be removed from the present place as there is no other suitable locality for the purpose. The Board considers that the building in the centre of the Main Bazaar street now used as Police School may be given for the Anche office and it is well suited for the purpose. The Police School may be removed to the eastern portion of the Town Police Head Station House.

3. Read docket No. 92 of the 8th August 1888, from the Vice-President of the Bangalore City Municipal Board, anent the management of the internal details of the Municipal School.

Resolved that the above docket be recorded.

4. Read docket No. 17, dated 6th July 1888, from the Police Assistant Commissioner, together with a bill for Rs. 5—0—0 from Mr. Smith, being the charge for cleaning and repairing the clock in the Town Police Station and a memo for Rs. 5—0—0 for a deal wood case with a glass front for securing the said clock from exposure and requesting sanction for the same.

Resolved that as these items are not provided for in the current Budget and no funds are available they cannot be separately sanctioned, but the Board have no objection to these amounts being paid for out of the head "Police Contingencies" or "the repair and purchase of furniture" provided for in the above Budget.

5. Read statement showing the work done to the Municipality by convicts during the month of July 1888.

Recorded.

6. The meeting unanimously resolved that a detailed account showing receipts and balance of Municipal tools and plant be placed in future for inspection before every meeting of the Board.

7. Read the detailed list of expenditure incurred during the out-break of cholera in Shimoga in 1887. Out of Rs. 2,500 sanctioned by Government in Dewan's Proceedings No. 1418—19, dated 8th October 1887, a sum of Rs. 2,240 has been expended as per particulars given in the list.

Resolved that the charges be accepted and the list submitted to Government for information.

8. Read Shimoga Amildar's report No. 32, dated 1st June 1888, anent applications of Mr. T. Bhima Rao and Musa Sahib for lands bearing Survey Nos. 17 and 18.

Resolved that the lands cannot be given out as they are in close proximity to the Maharaja's Park and the Municipality may be in need of them at any time hereafter. The applications be rejected.

9. Read Shimoga Amildar's report No. 381, dated 21st February 1888, in connection with the grant of building sites by the side of Durgammadevaru temple.

The 14 building sites near the plain of Durgamma's temple were set apart some 8 or 9 years ago for Catholic Christians at the rate of six pies per square yard, *vide* Resolution No. 8 of the Board Proceedings dated 29th October 1879. Out of these, 8 have already been given to the above Christians and 3 more, for which applications from the above community are pending, will be given out.

Now, there remain 3 sites referred to in plan Nos. 5, 6 and 7, about which the Devotees of Durgamma state that the above sites are very close to the above temple and that if this place were to be given out either to the Christians or to others to build houses upon, the backyards and latrines of such houses would come by the side of the temple thereby causing annoyance to the worshippers in the temple and would interfere with samárádhana at the time of car festivals at Horabid, &c., and pray that the sites be reserved for the temple itself and say that they are prepared to pay the value of the site.

As the Board considers the request to be reasonable and as the Christian residents present have agreed before the Board to the retention of the lands by the temple, it is resolved that the above three sites be made over to the temple on condition of their being included in the temple compound and kept clean, and on payment of the price of the sites.

10. Read Shimoga Amildar's report No. 71, dated 6th August 1888, with its enclosures on the petitions of Patel Channavirappa and Setra Basappa praying to be allowed to collect the mohatarfa.

Resolved.—The Board see no reason to disturb the present arrangement.

11. The meeting find that much inconvenience is felt in the proper management of Municipal affairs in consequence of the non-receipt of orders on the following subjects, and it is respectfully solicited that the Government will be pleased to pass their orders at an early date to the references below specified and thereby enable the Board to carry out certain improvements which Shimoga is much in need of:—

(*a*) Introduction of Bye-laws submitted with the Board Proceedings dated 15th November 1884 or any other Regulations which the Government may be pleased to introduce in the Municipalities, *vide* Proceedings dated 31st May 1887.

(*b*) Transfer of the cost of the Town Police Force to the Provincial Budget, *vide* Resolution Nos. 13 and 8 of Proceedings dated 13th August 1886 and 12th March 1888.

*Resolution.*—The Board, while recognizing the urgent necessity of repairing the school building, regrets there are no funds with which the Municipality could meet the charges; so would strongly recommend to Government that a grant-in-aid equal to half the estimated cost be given from Provincial or other Funds, as may be thought proper.

1. Read accounts of Municipal receipts and expenditure for the months of September and October 1888, showing under the head of Octroi receipts a net decrease of Rs. 176—14—8 and a net increase of Rs. 108—3—2 respectively chiefly in the item of "Cloth."

Resolved that the accounts be passed.

2. The Vice-President laid before the Meeting detailed statements of the estimated monthly receipts and expenditure of Municipal Funds from November 1888 to the end of March 1889. These statements show that the small balance of Rs. 635—9—0 now in hand added to the anticipated receipts of Rs. 7,443 up to the end of March 1881, makes a total of Rs. 8,078—9—0 which will not be sufficient to meet the establishment charges and the cost of incomplete works amounting to Rs. 9,316 up to the end of the same period.

The Meeting after full discussion resolved to request Government to favor the Municipality with a loan of Rs. 5,000 without interest repayable by instalments of Rs. 1,000 per year or even earlier if the condition of the finances of the Municipality admits of it.

3. Read letter No. 1011, dated the 22nd September 1888, from the Military Secretary, requesting to be informed what assessment will be levied on the houses in the Shimoga Barr Lines and whether it should be paid yearly or half-yearly.

Resolved that the houses in the Barr Lines be assessed on the same principle as that adopted in the case of other houses in the Town, *viz*, the value of the buildings and that the assessment be levied annually through the Military Secretary.

1. Read docket No. 362, dated 10th September 1888, from the Civil Surgeon, Shimoga, and para 4 of the above officer's Annual Report for 1887—88 on the work performed by Mrs. Dawson, the Municipal midwife of the Shimoga Town.

Resolved that 6 months be given to Mrs. Dawson in order to show better results in the discharge of her duty and to gain more popularity amongst the residents of the Town and that the Civil Surgeon be requested to give the Board his opinion on Mr. Dawson's services on the expiry of the above period.

2. The meeting are of opinion that the present site for the disposal of the night-soil is objectionable being on the windward side of the Town in low swampy ground, so situated as to allow filth to percolate into the river, the water of which the people drink. The sweepings of the Town are not deposited in a suitable place, the Board therefore resolve that a sub-committee consisting of the following gentlemen be formed to select more suitable sites for these purposes :—

The President or Vice-President.
" Civil Surgeon.
" Executive Engineer.
Revd. B. Robinson.
Mr. M. Ramprasad Tivari.
" N. Mojappa.

The proposal of a sub-committee to be brought before the Board for discussion at the next meeting.

3. Read Shimoga Amildar's itilla No. 86, dated 18th August 1888, anent the encroachment on land belonging to the Municipality by the side of the road in Nagappa street by one Batni Gopal Rao, in constructing his house. As there is no Bye-law to enable the Board to take prompt and summary action in matters like this, the Board resolve that the Government be again moved to accord sanction to the introduction of Bye-laws into the Shimoga Town as requested in the Board Proceedings noted in the margin.

1. Proceedings, dated 15th November 1884.
2. Do 31st May 1887.
3. Do 16th August 1888.

4. The situation of the present Muhammadan grave-yard in an open space close to the high road and exposed to the view of the houses situated in its vicinity is, in the Board's openion, very objectionable. The Board are therefore of opinion that it is desirable that the Musalmans should build a wall on the road-side and plant a good hedge on the other sides. On explaining the matter to the Khazi and other Muhammadans present, they said they would consult the Musalman community and report their views to the Board.

Resolved that the Vice-President do ascertain the wishes of the Muhammadan community on the subject and submit a report to the Board.

5. Doctor Choksi proposed that a Sanitary Inspector be appointed to attend to the sanitary condition of the Town generally and to test the quality of articles of food, &c., exposed for sale in the market.

Resolved that there is no necessity for a distinct appointment for this work, as the present Overseer who draws a salary of Rs. 25 a month and a horse allowance of Rs. 5 ought to be able to do it and must do it. The Vice-President and the Civil Surgeon were requested to draw up a set of rules for his guidance and it was resolved that the Overseer be ordered to keep a diary of the work done by him for presentation at each meeting.

The meeting adjourned till the 5th instant as there was no time to discuss the other subjects.

7. Read Shimoga Amildar's No. 112, dated 23rd September 1888, submitting a bill for Rs. 8 being the charge for preparing three plans and three estimates as detailed in the margin by Madurmuttu Pille, Draughtsman, Executive Engineer's Office, Shimoga Division.

Resolved that the bill be passed and the amount be paid from the Reserve fund.

8. Read Doctor Choksi's docket No. 392, dated 21st September 1888, applying for a sum of Rs. 20 for animal vaccination.

Resolved that the above sum be paid from the Reserve fund.

9. Read letter No. 4570—116, dated 25th September 1888 from the Chief Secretary.

(*a.*) Stating that the liquor license fees which the Board applied for have since been abolished and that in lieu thereof a small cess of annas two per gallon has been levied from 1st April 1887.

(*b.*) Enquiring if any portion and if so, how much of the Kumbargundi project was executed out of the amount, *viz.*, Rs. 10,401 sanctioned last year for sanitary works in the Town and what proposals the Board would now make for the completion of the above work and (*c*) with regard to the proposed abolition of octroi duty on some articles requesting to be furnished with a statement showing actual realizations during the past five years from such of the articles as are proposed to be exempted from duty.

With reference to (*a*), the Board considering the present financial condition of the Municipality, thinks that if the Government were pleased to sanction the allotment to the Municipality of the revenue realized according to the new scale both on Europe and country liquors, it would be of considerable help to the Municipality towards carrying out some necessary improvements in the Town.

As regards query (*b*) the Board beg to bring the following to the notice of Government.

Out of the works sanctioned last year as sanitary measures, only the marginally noted two works belong to Kumbargundi; of which the road works are nearly completed but the tunnel work has not yet been commenced. By the formation of these roads some portions of Kumbargundi have been filled up and places where nuisance used to be committed by the people at large have been converted into public roads.

| | Rs. |
|---|---|
| (1.) Opening new road through the backyards of the houses along the Main bazaar ... | 1,000 |
| (2.) Extending the existing road in front of the Kumbargundi Matt and connecting the same with the Main bazaar street together with the construction of a tunnel across the road in Kumbargundi ... ... ... ... | 1,500 |

Some more work remains to be done to this Kumbarguudi which will have to be done in connection with the drainage scheme for the town, of which mention was made in Resolution No. 9, dated 30th December 1886. These projects require a large sum of money and professional skill for their elaboration and execution; the Municipality with its limited finances is unable to carry out these works and the Board therefore resolve to request the Government to entrust the same to the Department of Public Works or other special agency.

Regarding (*c*) the Board herewith submit a statement showing the actual realizations during the past 5 years from such of the articles as are proposed te be exempted from duty.

10. Read Dewan's Proceedings No. 468—76, dated 26th May 1888, and late Chief Commissioner's Nos. 2402—35 and 739—48, dated 6th July 1876 and 10th May 1880, regarding the levy of Municipal tax on Government buildings.

The building now occupied by the Deputy Commissioner appears from the records to have been private property up to Chitrabhanu 1882—83 and to have been taxed with Rs. 17 per annum by the Municipality. During the latter part of the year Chitrabhanu, it was purchased by the Government and the tax was remitted on the ground that it was Government property.

Resolved that this building be taxed from Sarvadhari 1888—89 according to the orders conveyed in the above Proceedings and also that a bill be forwarded to Government for the recovery of the arrears due from Sobhanu 1883—84 to Sarvajitu 1887—88.

11. A row of quarantine huts as per Civil Surgeon's suggestion have been constructed at a cost of Rs. 200 out of the town near the Distillery for the accommodation of travellers who pass from Districts where cholera is prevalent such as Tirupati, &c., so as to prevent the introduction of the disease into the Town as far as possible.

Resolved that the Deputy Commissioner be requested to obtain the sanction of the Government to meet the above sum from the Local Funds, as the Municipality is not in a position to bear the above charge for want of funds.

12. Read the following account of receipts and expenditures incurred on the formation of Clarke Pettah in the vicinity of the Shimoga Traveller's Bungalow :—

*Receipts.*

| | Rs. | As. | P. |

The progress hitherto made in the opening of that new street is as follows :—

1. For the improvement of the same, land measuring acres 3, guntas 9 has been purchased from one Nadig Ranga Rao for Rs. 120.

2. A plan of the Pettah with its adjoining places has been prepared.

3. Some new roads have been opened.

4. Out of the locality set apart for that Pettah, sites have been so apportioned as to enable persons wishing to build houses there, to build decent ones 20 sites have been already purchased by certain persons to erect houses, and some of the latter have commenced to sink wells in their sites with the view of building houses as soon as they have secured a good supply of water, while others who are unable to incur the cost of sinking wells are deterred from building houses on the sites secured by them. A well at the cost of the Municipality would remove this drawback.

The Board resolve that the Municipality do take this matter into consideration when funds are available.

*Absent.*

1. E. R. Subbarayar, Esq., Executive Engineer.
2. Dr. Atchyuta Rao, L. M. S., Assistant Surgeon.

1. The President informed the members that this Meeting was convened in pursuance of Resolution No. IX of the Proceedings of the General Committee, dated 8th June 1888 in order to go over the lists of prizes in detail.

2. The following Resolutions were recorded :—

I. That mules, asses and pigs and castrated sheep may be allowed to be exhibited and that prizes may be offered for these.

Mr. Anderson remarked that mules could be bred in the country and that they would prove very useful for all kinds of work in hilly places.

Mr. Purnaiya stated that asses are the sole beasts of burden to the Washermen and Korchar, Vaddar and Lambani carriers of grain in roadless tracts ; that no class of animals was subjected to greater systematic neglect, and that inducement for the improvement of the breeding of this animal was very desirable.

Pigs were reared in almost every village and could therefore be easily competed for, so also castrated sheep.

II. That prizes may be offered for cotton fabrics and for made up articles of wool and cotton.

Mr. Chelviengar, Assistant Commissioner, stated that good imitation checks and chintz were manufactured in Siddarhalli, Belur Taluk, and this industry is quite as useful as that of making mens' and womens' cloths.

Mr. Rees was making woollen stockings largely from imported woollen thread employing his orphanage girls and this has become almost a means of livelihood for many of the orphanage women married and started in life. Being a new industry this was deserving of encouragement.

III. The following articles were then named as deserving to be exhibited :—

(*a*). Under head "fibres" bende, gonlu and tadasalu.

(*b*). Under head "vegetables and fruits" edible roots and berries, such as—

1. Magaleberu.
2. Mudi Agalakayi.

8. " Vemagal Narnappa.

Read Dewan's Proceedings Camp No. 805-814,—Cir. 21½, dated 3rd May 1888, sanctioning an Agricultural and Industrial Show being held at Mysore after the ensuing Dasara, and Letter No. 54—61 of the 17th May 1888, from the Director of Statistics and Agriculture, requesting that arrangements may be made for the collection of exhibits and for otherwise contributing to the success of the Show,

Resolved—

I. That the undermentioned gentlemen be nominated members to form a Committee for this District with the Deputy Commissioner as their Chairman for arranging for the details connected with the Show.

1. Mr. K. Ramachanadra Rao, General Assistant Commissioner.
2. ,, B. Krishnaiengar, Treasury Assistant Commissioner.
3. ,, V. K. Swaminatha Iyer, Assistant Surgeon.
4. ,, Abdul Aziz, Amildar, Kolar.
5. ,, Venkata Rao, Pensioned Amildar.
6. ,, Bandari Munisamaiya.
7. ,, Saukar Vemagal Naranappa.

II. That the coming Show being the first of the kind in Mysore, every member of the Committee should do his best to make it a complete success, and arrange for sending to the exhibition the best specimens of articles of local produce and manufucture on receipt of a detailed instructions from Government regarding the number or quantities of the exhibits and the manner of their forwardal.

III. That in accordance with orders already issued by the Deputy Commissioner, every Amildar should form a Sub-Committee composed of 2 respectable ryots and 2 merchants with himself as the President for the collection of the exhibits in his Taluk and report the names of the members to the Deputy Commissioner.

IV. That Mr. General Assistant Commissioner K. Ramachandra Rao, as the executive member of the District Committee, be entrusted with all the details connected with the ensuing Show, and that he be requested to arrange every thing that is necessary to promote the object of the exhibition, corresponding direct with the Amildars of Taluks and with the Joint Secretaries of the Central Committee at Bangalore on all matters concerning the Show, and issuing needful instructions to the Taluk Sub-Committees on the subject.

2. The Amildar of Kolar brings to notice that where the exhibits are small in value such as lace, Turkey's grains, &c., the owners being generally poor cannot afford to take the articles to Mysore, and it is therefore necessary that the District Committee should be in possession of funds to enable them to purchase the exhibits and forward them to Mysore at Government cost. In the case of the more valuable exhibits such as ponies, bullocks, cumblis, cloths, sheep, &c., the owners may be asked to go with them to the Capital, but it is not possible always to induce the owners to undertake the journey and the risk of loosing their exhibits.

3. Resolved, that the Director of Statistics and Agriculture be addressed with a view to definite instructions being issued as to which of the exhibits approved by the Local Committees should be purchased, and which are to be sent with the owners, as also what is the nature and extent of help to be given to the owners, where they are too poor to undergo the expense required for the purpose.

4. Resolved, that the Taluk Sub-Committees should have the power of rejecting such of the articles tendered as may not be considered by them desiring of being sent to the exhibition.

5. Proposed by the members that, in order to induce the owners to take their exhibits to Mysore, they should be allowed to travel by Rail free of charge as was done on the occasion of the exhibition lately held at Salem.

Resolved, that the proposal be submitted for the consideration and orders of Government.

With reference to your letters Nos. 54—61 and 25, dated 17th May and 22nd June 1888, respectively on the subject of the Agricultural and Industrial Show to be held at Mysore after the Dasara, I have the honor to inform you that a Meeting was held on the 11th June 1888 in view to the nomination of official and non-official gentlemen as members of the Sub-Committee and the following gentlemen elected for memberships.

*Official Gentlemen.*

2. The Amildars have also been directed to form Taluk Committees in the Head-Quarters of each taluk and detailed instructions issued to them in order to give wide publicity to the approaching Show and ascertain the description, &c., of the exhibits that may be available in each taluk. Their reports as to the formation of the Committee will be sent on to you as received.

3. As regards the prize lists the Kanarese copies of which have been sent to Amildars for distribution among the Agricultural and Industrial Classes, it is observed that the different prizes noted apply to the best exhibits contributed from all parts of India, and the Sub-Committee are therefore of opinion that a few prizes should be reserved and confined to the Mysore grains and other articles of manufacture. Special prizes may also be offered for the best cultivation including quantities of outturn per acre, qualities of the grains grown. &c., The prizes may be offered and the competition made in the different parts of the District. The Sub-Committees will decide who are the winners and they may be awarded prize at the time of the Exhibition. It is of course too late to carry out this suggestion this season.

4. The Committee have suggested that under Class II "Cattle" and Class VI (f) "Woollen Fabrics," riding bulls and stockings, caps and comfortors Mysore made may be respectively added and prizes offered for best specimens, while under "Class IV. Furniture," a defeLite and detailed description of the wooden furniture to be shown should be given.

5. In conclusion I beg to add that earnest endeavours will be made to promote the object of the Show by securing the best collections of exhibits available in this District. The prizes noted as regards collection of tools and some machineries seem to require modification, and I will communicate with you again on the subject after convening a 2nd meeting and thoroughly discussing the same.

GOVERNMENT OF INDIA.

## REVENUE AND AGRICULTURAL DEPARTMENT.

### WEATHER SUMMARY FOR JUNE 1888.

The month under review is meteorologically one of the most important throughout the year.

It usually sees the commencement of the rains over almost the whole of India and the relative distribution and copiousness of the total monsoon rainfall cannot infrequently be gauged from the rainfall of this month. The setting in of the rains is normally a very different phenomenon on the Bengal side to what it is on the western side of India.

In the former region the change to the wet season takes place on the whole gradually. The southerly winds which blow in from the Bay and pass as east and south-east winds along the face of the mountain belt become steadily damper and cooler, and finally a rush of saturated air coming from the far south spreads over the greater part of Northern India and the change to the rains is completed

In Lower Bengal the rains usually set in about the second week in June, in the North-Western Provinces sometime during the latter half of the month, and in the Punjab hardly before July. On the West Coast the setting in of the rainy season is usually more sudden and more striking. A slight but important change in the wind direction takes place in the shape of a shift from about west-north-west to west-south-west, and a strong, cool and saturated current suddenly replaces the moderate and warm wind which has previously prevailed. The admixture of the two currents usually results in great electrical disturbance, and as the monsoon travels up the West Coast its appearance is accompanied by severe thunder-storms. The rains ordinarily commence in Ceylon in the middle of May and reach Bombay about the 5th of June. On the present occasion the setting in of the rains has been accompanied by several abnormal features, which apparently have been principally attributable to unusual conditions over the Bay of Bengal. The distributions of pressure and of temperature and the prevailing direction of the winds in the months preceding that in which the rains ordinarily appear had all been such as to promise an early and good monsoon, and the weather experienced over India during the first ten days of the month went far to fulfil this promise. During these ten days rain in fairly large amounts fell all along the West Coast and around the shores of the Gulf of Martaban, and showers in the Central Provinces and in Upper Burmah, while in Bengal and Assam there was general though slight rain and in Upper India frequent falls and all the appearance of the monsoon. These favourable conditions did not, however, last beyond the first ten days. On the 11th there was hardly any indraught of monsoon winds into Northern India. A moderate south-westerly and westerly winds blew on the West Coast, and passed over the Peninsula and the Central Provinces, giving light showers to those regions ; but over the Bay the wind's direction was also westerly and south-westerly without any tendency to draw into south and south-east at the head of the Bay as is normally the case and in consequence all the rain due to this current fell in Burmah and Arakan. Such conditions are not only unfavourable to rain-fall in Bengal and Upper India, but exert a detrimental effect on the West Coast current also, so that the succeeding days showed a decrease in the extent and amount of the rainfall derived from the Bombay branch of the monsoon, though there was at no time such an entire failure of the rains in Western as occurred in Northern India.

On the disappearance of the damp south-easterly winds which blew up the Gangetic plain between the 1st and the 10th or 11th of the month, a period of calms and variable airs commenced over Northern India. These lasted until the 13th, after which the north-westerly winds which are characteristic of the hot season set in, and lasted with some temporary interruptions until the 26th. During this period the only rain which fell over North-Western and Northern India occurred during dust or thunderstorms, and was in no way connected with the monsoon. During the same period the air motion was generally feeble and irregular on the West Coast, and though the current from the Bombay side penetrated into the Central Provinces, and gave some rain there, the amounts were generally abnormally small and insignificant. In fact the only region in which rain fell to any extent was Burmah, where some fairly large amounts were recorded.

Owing to the cessation of the rains in Northern India and the appearance there of the north-westerly winds above alluded to, very high temperatures were experienced over that part of India. The thermometer began to rise quickly directly the rain ceased, and by the 13th or 14th excessive temperatures were reported from Bengal. At this time the temperature in Bengal was higher than it had been for many years past, and the heat all over Orissa and Lower and West Bengal was most exceptional. This area of excessively high temperature apparently travelled slowly up the Gangetic plain and Allahabad, Agra, Delhi, Lahore, and finally Peshawar experienced one after the other excessive heat.

The following table which gives the highest maxima, and the date of their occurrence for several stations in Northern India shows the progress north-westward of this wave of heat :

| Stations. | Highest maximum recorded. | Mean temperature of same day. | Relative humidity of same day. | date. |
|---|---|---|---|---|
| Calcutta .. .. .. .. | 106·8 | 95·7 | 61 | 14th |
| Burdwan .. .. .. .. | 108·7 | 96·6 | 55 | 14th |
| Benares .. .. .. .. | 114·3 | 101·8 | 30 | 23rd |
| Allahabad .. .. .. .. | 114·2 | 103·1 | 35 | 23rd |
| Delhi .. .. .. .. | 114·0 | 103·6 | 37 | 25th |
| Ludhiana .. .. .. .. | 112·8 | 100·0 | 32 | 25th |
| Peshawar .. .. .. .. | 118·0 | 99.9 | 44 | 27th |

This table shows very clearly the intense heat which prevailed at this time. The highest maximum reported was 118° at Peshawar, but relatively cool nights were experienced at this station, and the mean temperature for the 24 hours was lower than at the stations in the North-Western Provinces and the south-east of the Punjab, where the actual maxima were lower. The highest mean temperatures were at Allahabad and Delhi. In Bengal both the maxima and the daily means were lower than at stations further to the north-westward, but the heat appears to have been more trying in Bengal than elsewhere, partly probably on account of its unusualness and partly on account of the relatively high state of humidity in the atmosphere.

As mentioned above, the north-westerly winds and dry weather lasted roughly until the 26th. On that day a change which had been slowly developing began to affect the weather. This change came from the western side of India. The force of the monsoon began to steadily increase from Ceylon north-ward as far as Sind, and the current gradually extended into the Central and North-West Provinces. It occasioned rain over these regions, and by the 28th was blowing along the face of the North-West Himalayas as a south-east wind and brought up rain as far as the east of the Punjab. On the West Coast this increase in the strength and depth of the monsoon current was accompanied by heavy falls of rain, and the general appearance of the weather at the close of the month was more promising than it had been at any time since the withdrawal of the monsoon in the early days o the month.

The concluding table shows very clearly the general feebleness of the monsoon during the past month. Only in the districts of Assam, the Berars, the Konkan, Malabar, Burmah, and Ceylon was the monthly average rainfall exceeded ; in all other districts it was in defect. The greatest deficiency was in Northern India and more especially in Bengal and Orissa. In Northern Bengal the total rainfall was only 4 inches instead of the normal 18 inches ; in Lower Bengal it was 4 inches instead of the normal 12 inches, and in Orissa 2½ inches instead of 7 inches. In many other districts the defect was nearly as large, and in Sind there was no rain whatever.

The following table shows the amount of rain and the difference from the average during the month of June, 1888, according to districts, as far as is indicated by the telegraphic reports :

| Districts. | No. of Stations. | Average rainfall in June. | Difference from the average in June 1888. |

*The 5th September* 1888.

Report submitted by the Joint-Secretaries to the Central Committee, Bangalore, dated 21st August 1888.

President and Gentlemen—

On the 3rd May last the Government accorded sanction to an Agricultural and Industrial Exhibition to be held at Mysore about the middle of October 1888, and directed the formation of a Committee with Mr. Ricketts as its President, for the management of the Exhibition. The Committee met for the

first time on the 30th May and sat for three days and passed the final Prize list, which subsequently received the sanction of Government. The final Prize list provided for Rs. 8,447—0—0 on account of prizes against Rs. 7,215 provided for in the original draft, thus effecting an increase of Rs. 1,232 in the amount of prizes. The balance is therefore reduced to Rs. 1,553 available for the erection of the Exhibition Buildings, the maintenance of temporary establishments, the purchase of stationery, printing charges and other expenses. The Exhibition Buildings alone may be roughly calculated to cost Rs. 5,000 gross and other expenses Rs. 1,500. It is therefore necessary to apply to Government for an additional grant of Rs. 5,000. The details of expenses hitherto incurred may be summarized as follows :—

(*a.*) Rupees 100 have been placed at the disposal of each of the Deputy Commissioners of Hassan, Shimoga, Kadur and Chitaldroog for any expenditure which may be found necessary for the forwardal of exhibits. The other Districts have not been given a similar amount as they have the advantage of Railway communication.

(*b.*) Rupees 850 have been advanced to the Deputy Commissioners of Bangalore and Mysore for purchasing plaited cocoanut leaves for roofing the sheds and a further allotment of at least Rs. 500 will have to be made under this head.

(*c.*) The Forest Department has been requested to lend the requisite number of bamboos, which arrangement effects a considerable saving under buildings.

(*d.*) Messrs. Addison and Co's. bill for printing Tamil and Telugu copies of the Prize list amounts to Rs. 118.

(*e.*) A non-official Gentleman has undertaken to visit the principal stations of Southern India, with a view to give wide publicity to the Exhibition, as well as to enlist the co-operation of public spirited men. His travelling expenses estimated to amount Rs. 150 will be defrayed from the Exhibition funds.

(*f.*) Rupees 50 have been expended on service stamps and sundry charges connected with the distribution of Prize lists outside the Province.

(*g.*) Sanction of the President has been obtained for appointing an Overseer on a salary of Rs. 25 per mensem, to supervise the construction of the Exhibition Buildings. Thus the amount till now expended is Rs. 1,568.

We now beg to place before you a brief resume of the work we have till now transacted. Our endeavours have been directed chiefly towards giving wide publicity to the Exhibition, the selection of the Exhibition site and the collection of materials for the sheds.

The advertisement of the Exhibition has now been fairly completed. In our Province a large number of Kanarese copies of the Prize list have been forwarded to the Deputy Commissioners for distribution among the ryots, merchants, mechanics and others, through the Amildars and their subordinate officers. A large number of Kanarese hand bills and Prize lists have again been distributed through the agency of the Police with directions to put up a Prize list at every Hobli chavadi and Police Station and to deliver a hand bill to every important villager. Copies have also been sent to the Officer, Amrut Mahal Department, for favor of distribution among the Servegars who are likely to exhibit good specimens of cattle, and to the Superintendents of Workshops, Mills and Orphanages. Hand bills have been freely distributed to all the shops and bazaars in the towns of Bangalore and Mysore. The Inspector General of Prisons has been requested to order the exhibition of articles manufactured in Jails. The leading Newspapers within and without the Province were also requested to give the subject wide publicity. The Mysore Government Gazette has likewise published the Prize Lists and Regulations in three successive issues, and is now devoting a separate Section for the publication of official papers connected with the Exhibition. The Coffee Planters and the several planters Associations have also been duly apprised of the details. Suggestions have been made to the Deputy Commissioners to hold Mass Meetings at all the District and Taluk Head-quarters and to form Taluk Sub-Committees which are to meet every week and forward their proceedings through the District Committees. It has also been advised to publish the requisite information by means of tom-tom, hand bills and placards at the weekly fairs held in different parts of the Province.

Outside the Province likewise a large number of English, Tamil, Telugu and Kanarese copies of the Prize list have been distributed through the British Resident, and the Government of India have also been solicited to address Local Governments and Native Administrations in India to co-operate in this matter. Copies have been sent direct to the leading firms, manufactories and mills, and to several private gentlemen in India. The important firms in Madras and the Superintendent of the Madras School of Arts have been specially invited to favor us with their exhibits. It is also proposed to stick up English placards at the important Railway Stations and in the important towns of the Madras Presidency.

Mr. Hewetson as a member of our Committee has taken much interest in our undertaking and we expect a large number of good exhibits from what may be termed the entrepôt of trade with the Province, and the centre of a large trading and manufacturing community. Government have also

been requested to address the British Resident, if possible, with a view to secure more organized co-operation on the the part of the authorities of the Assigned Tract by the formation of a separate Committee.

We have received letters from Messrs. Massey & Co. of Madras, the Superintendent of Betti Farm, the Superintendent of the Basel Mission, Mangalore, and certain private individuals from without the Province intimating their intention to take part in the Exhibition. The applications receive are not however many, but there is yet time to hope for better results.

We have now to say a few words about the Exhibition site and the buildings to be constructe thereon. The Rangacharlu Memorial Hall compound had at first been proposed for the site. It wa thought that its central position and the proximity to a large building to hold valuable exhibits wer recommendations in its favor. But during our last visit to Mysore we learnt that a large volume o sewage water passes through a drain across the land during the rains, and found that the ground were not ready and that public opinion was strongly against the utilization of the site, and moreove the ground is not sufficiently extensive for our purposes and is far away from any land fit for holding the ploughing competitions. The townsmen were afraid of infectious diseases breaking out on the occasion among men and cattle. A consideration of these contingencies led us to the selection of a new site between the Public offices and the Victoria Jubilee Institute now under construction. This site has several advantages both in its position and in its surroundings. Situated on an eminence it commands a view of the whole city, has a good drainage and the purest air. The ground is hard affording a firm fixture to the buildings, and decently level, and commands important convenience of water supply on either side. It is sufficiently near the town without its being too near, and is about 6 furlongs from the Railway Station, 4 from the Nanjaraj Bahadur Chattram, and only a furlong from the old Distillery buildings below the Kukarhalli tank both of which will afford ample accommodation to the visitors, and the Deputy Commissioner of Mysore has been kind enough to promise the use of these buildings for the purpose. Under these circumstances we have obtained the sanction of the Presider to the change of site and have commenced work. The grounds have been measured and marked o and we have also laid out the positions of the sheds. The necessary materials for building the shed have been mostly stored on the grounds, and a contractor has been directed to construct an experimental shed with a view to estimate the cost as accurately as possible. The Deputy Commissioner ha also been requested to invite tenders from contractors and these measures will, it is hoped, reduce th expenses on account of the buildings as much as possible. Either of the Secretaries will go back t Mysore on Thursday to decide about the contract in conjunction with the Deputy Commissioner.

These, Gentlemen, are briefly the measures till now carried out in respect of the Exhibition. W shall be happy to receive and carry out any instructions you may give regarding the management o the Exhibition, its further publication, and the construction and decoration of the sheds.

We must be permitted to submit that too much cannot be done towards the success of an exhibition ; and in Mysore the undertaking is the first of its kind. Besides, we have to contend against difficulties more or less beyond our control. When the Exhibition was sanctioned, the Government hardly anticipated the unfavorable aspect, which the present season has assumed, causing anxiety to the Agricultural population on whose activity and co-operation the success of our exhibition so much depends. Apart from the peculiarities of the present season, October is hardly the time when a large collection of Agricultural products can be expected. Further, the Poona Exhibition is advertised to be held at about the same time as our Exhibition, and this will in no small measure take away from the general effect of our undertaking, if not from its success. It appears to be formed on a large scale, to continue for so long as a month, and to afford greater facilities to intending exhibitors. Th Poona Exhibition has proposed to bear the charges of transmission of the exhibits both to and from th scene of Exhibition. The Mysore Exhibition on the other hand promises a free passage of the exhibit only on their return to the forwarding station—a concession which the Railway Companies have kindly made. We should therefore like to propose, with a view at least to an equal encouragement, to promise to bear the expenses of tranmission to Mysore of the exhibits to the extent of the actual Railway charges. There is also another proposition which we venture to submit for your favorable consideration and which will materially tend to increase the number of exhibits and consequently the success of the Exhibition. Resolution 13 requires intending exhibitors to be in charge of the exhibits, in person or by an agent, the Exhibition Committee declining to receive articles consigned to their address This rule would work harshly in the case of a large number of exhibitors who may like to *send* in exhibits, but who may not be able to spare the time, expense and trouble of *accompanying* their exhibits We have also received a few representations of this kind. These circumstances induce us to propose the appointment of an agency to receive exhibits on behalf of exhibitors, arrange for their safe custody during the Exhibition, and have them sold or returned as the exhibitors may desire. Perhaps a percentage commission may be levied on sales thus effected to meet the cost of the agency, and any extra expenditure which may be incurred, may be defrayed from Exhibition funds.

## WEATHER SUMMARY FOR JULY 1888.

*Simla, 6th August* 1888.

During July, in normal years, the rains are established throughout the whole of India. The monsoon currents on both sides of the country blow with their maximum strength, and in Upper India temperature undergoes a rapid fall. July is also remarkable for the large number of small cyclonic storms which form over the Bay. These storms are a common feature of the whole of the south-west monsoon period, but they are usually more numerous in July and August than in the preceding and succeeding months. They usually travel on a west-north-west or north-west course from the Bay into Upper India, and are ordinarily followed by a strong burst of monsoon winds and accompanied by heavy rainfall.

The weather of the past July has in many ways fulfilled these conditions. On the 1st, favourable monsoon conditions prevailed over nearly the whole country, and rain was falling in most places; though in the Punjab, Rajputana, and Central India the falls were somewhat slight and scattered. These conditions continued on the 2nd, except in Bengal, where a slight but distinctly marked depression was formed, and was accompanied with dry north-westerly winds in West Bengal and the east of the North-Western Provinces. Rain had been some-what heavier in the Punjab, but was still absent from the south of that Province and from Rajputana. On the 3rd the depression from Bengal had reached Benares, and heavy rain was falling in Behar, the North-Western Provinces, and the Central parts of the country. This increase of rain in the lower part of the Gangetic plain was accompanied by a decrease in Upper India. There was very little change on the 4th and 5th. Moderately strong monsoons were blowing on both coasts, and rain was falling generally, except in the Punjab, Western Rajputana, Sind, and Guzerat. The Chart of the 6th showed that the depression which had been advancing up the Gangetic plain had disappeared, and the rain-fall, except on the West Coast, had fallen off considerably. Between the 7th and 11th normal monsoon weather prevailed throughout the greater part of India, but the rain-bearing currents did not extend properly into the Punjab, where, though mist and slight rain occurred almost daily on the hills, the weather was hot and dry. On the 12th a small depression was shown off the Ganjam Coast. This depression was accompanied with easterly and north-easterly winds in Bengal, and as a consequence the rainfall over that Province decreased considerably, and only insignificant showers were experienced. On the morning of the 13th the centre of depression was off Orissa, and a well marked cyclonic circulation of the winds was shown in its neighbourhood. The rain fall remained very light in Bengal, but elsewhere it was general and fairly heavy, and had extended into the Eastern Punjab and Rajputana. Between the 13th and 14th the depression passed inland across Gopalpore, and steady monsoon winds were blowing throughout India. Rain was reported from all parts of the country, except the Carnatic, Kattiawar, Sind, and the Western Punjab. By the 15th the depression had reached the Central Provinces and to a considerable extent filled up, but there was no important change in the weather. On the 16th, 17th, and 18th the weather was of the ordinary monsoon type, moderate but general rain prevailing, except in the extreme North-West. On the 19th the Chart showed that another small cyclonic storm was forming—this time on the head of the Bay. A feeble but well marked circulation existed around the centre, which lay near Saugor Island, and the rainfall was light over Bengal, but heavy over Orissa. Elsewhere there was no change, and rain was reported as far west as Lahore. On the 20th the centre of the depression lay to the west of Calcutta, and a strong monsoon was blowing up the Bay and across the Bengal Coast. A strong monsoon was also blowing on the West Coast, and rain was very general, except in the Indus Valley, Rajputana, and Madras. By the morning of the 20th the depression had reached Benares and was filling up. Rain was falling in the same regions as on the 20th, the amounts being fairly large in the Central Provinces and on the West Coast. On the 22nd the centre lay near Allahabad. There was no change in the weather, but the depression was apparently filling up; and on the 23rd it had almost entirely disappeared. With its disappearance the amount of rainfall decreased. On the 24th a small centre of depression was formed near Benares, and during this day exceptionally heavy rain fell at Allahabad. Elsewhere the rainfall was moderate, and none fell over Sind or the greater part of the Punjab and Madras. During the next few days small local depressions continued to be formed over the lower part of the Gangetic plain, and were accompanied with heavy rain; but, perhaps as a consequence of this distribution, the rainfall of the upper part of the plain was slight, and in the Punjab and Sind there was little or none. Madras also had very little rain. Just at the close of the month rain extended over the greater part of the Punjab, but not in large amounts.

The concluding table exhibits a deficiency of rainfall at the majority of the meteorological divisions. The north-Western Provinces, Northern Bengal, and the Berars report a considerable, and Behar, Lower Bengal, the Central Provinces, and Lower Burma a slight excess. In all the other divisions a deficiency is reported, though on the whole the defect is not very large.

The following table shows the amount of rain and the difference from the average during the month of July 1888, according to districts, as far as is indicated by the telegraphic reports:

## WEATHER REVIEW OF INDIA FOR THE WEEK ENDING 8 A. M. ON MONDAY, AUGUST 6TH, 1888.

The relatively quiet conditions which prevailed over India last week have continued uninterruptedly during the week under review. The monsoon on the West Coast has blown steadily, but with not more than moderate force; and the rain which has accompanied it, though fairly continuous, has in general been light or moderate in amount. On the Bombay and Malabar Coasts the wind has been usually westerly, and with this direction has travelled right across the Peninsula; while on the Sind and Cutch Coasts the wind has been south-westerly, and has penetrated inland into Rajputana, &c.

In the Bay and Northern India conditions have been much less settled than in Western India. Several small shallow depressions have been formed over Bengal, and have passed over the south side of the Gangetic plain along a west-north-west course. The depressions have occasioned the usual cyclonic circulations in their neighbourhood, and heavey showers of rain have accompanied their passage across the country.

In the Punjab showers have alternated with bright, hot weather, and the rainfall has been slighter and the temperature higher than the normal.

On the 30th the barometer was rising generally. The distribution was fairly regular and normal in Southern, Western, and North-Western India, but over the Gangetic plain conditions were unsettled and small shallow depressions were shown—one near Berhampore, and one near Jhansi. The main low pressure area lay, as is normally the case, over the Indus Valley, and the high pressure area over Malabar, &c. A steady westerly monsoon was blowing across the West Coast and the Central parts of the country, and a south-westerly wind in Sind and Kathiawar. In Northern India the winds were very irregular in direction and feeble in force. The rainfall was fairly general though in the Peninsula the amounts were small and scattered, and in parts of Orissa, Behar, the Punjab, and Sind there had been none. The heaviest general rainfall was in Burma, Assam, and Lower Bengal. There was no important change in the weather on the 31st. Pressure was rather more uniform over Northern India, but the feeble depressions over Bengal and near Jhansi were still shown. The winds were also very similar to those reported on the 30th. Rainfall has again been light and scattered in Upper India and a large part of the Peninsula. Burma and Lower Bengal continued to receive the heaviest general rain, but Allahabad and Satna reported 3 inches and 2½ inches respectively.

The Chart of the 1st showed a fairly normal conditions of pressure, &c. Readings were lowest in the Indus Valley, from which region an arm of relatively low pressure extended east-south-eastward down the Gangetic plain. Within this arm small centres of depression existed—one lying over

613

Western Bengal, the second over Jhansi. The highest pressures were reported from Malabar. The wind circulation was also about normal, a well marked south-easterly current running along the foot of the hills. The weather was showery in Upper India, but from Lucknow westward there was but little rain; while in Guzerat, Sind, and the Circars there was little or none. Elsewhere rain was general and fairly heavy. On the 2nd the barometer was falling very generally—slightly in the south, and briskly in the north—and gradients were increasing over the Peninsula. The winds had about the normal force and, except around Jhansi, where there existed a feeble cyclonic circulation, nearly the normal directions. Northern India continued to receive only local showers, but elsewhere rain was general and fairly heavy. On the 3rd the barometer was still falling very generally, and there was little or no alteration in the general distribution. Northern India and Madras reported only scattered showers, generally of small amount; but elsewhere the rainfall, though moderate, was general.

The Chart of the 4th showed that the depression which had been noticed during the previous day or two near Jhansi had almost filled up, and that a new depression was appearing over the head of the Bay. The wind had shifted to north-west at Saugor Island, and was generally variable over Northern India. Over the Peninsula and Central parts of the country a steady monsoon was blowing. Rain had been fairly general, except in the Western Punjab and Sind. On the 5th there was very little change, except that the depression near the head of the Bay had moved westward, and lay between False Point and Saugor Island. The rainfall was generally moderate, and in Upper India was slight and scattered.

The table at the close of the Summary shows that the rainfall of the week has generally been below the average, though in the great majority of districts the defect has not been large. The divisions reporting an excess of rain are Tenasserim, Bengal (Deltaic), Orissa (where rain was much needed), the Punjab (Submontane), Malabar, Madras (South Central), the Konkan, the Central Provinces (East), Guzerat, Central India, Rajputana, and the East Coast (North and South). In the other 34 divisions the rainfall has been defective but in 14 out of the 34 the defect does not exceed ½ an inch. There are very few instances of heavy rainfall during the past week. In Tenasserim, indeed, the average for the whole division exceeded 2 inches *per diem*, but in other parts of Burma there were no cases of large local falls. In East Bengal and Assam the maximum falls in the districts varied between 3 and 6 inches, and Cherrapunji received only 6·8 inches. In Deltaic Bengal the falls were rather larger, Midnapur reporting 9½ inches; but in Central and North Bengal the maximum falls were also generally between 3 and 6 inches. In Orissa, the Cuttack and Balasore districts received good rain. Chota Nagpur and Behar had fairly continuous but generally light rain. The North-Western Provinces and Oudh had only showers, with no heavy falls; while the Punjab, though it received several heavy showers, had many days with hardly any rain. The West Coast districts had constant but not very heavy rain; and the same was true of most parts of the Deccan. Guzerat, Khandeish, the Berars, and the greater part of the Central Provinces received about an average fall; while Central India and Rajputana had a good deal more than the average. The Madras Presidency, except in the south, where there was an excess, received less than the normal amount.

The final column of the table shows that the seasonal rainfall is still defective over by far the greater part of the country.

WEATHER REVIEW OF INDIA FOR THE WEEK ENDING 8 A. M. ON MONDAY, AUGUST 13TH 1888.

Relatively quiet conditions have continued to prevail over India during the past week. Rain has been fairly general but not heavy, and the monsoon currents on either coast have blown with not more than the normal force On the West Coast from Karrachee to Karwar the monsoon, though by no means strong has been fairly steady, but to the south of Karwar the wind has been light and very variable, its direction on one occasion being from east and south-east. Rain fell continuously in the West Coast districts, but the amounts were not large, seldom much exceeding one inch in any single 24 hours.

On the Bay of Bengal side of India, the weather has been less settled, having been disturbed by a feeble depression which formed between False Point and Saugor Island and passed inland on a westerly course. The depression was very slight, and after passing inland became very diffused. It was followed by a strongish burst of monsoon winds, but the cyclonic circulation around it was in general very feeble.

In the Punjab and Sind the weather has been abnormally fine. On some days no rain whatever fell within the Province, and on others what little rain occurred was in the form of slight and scattered showers. On Tuesday the 7th falls exceeding 4 inches were reported from Delhi and Simla. In con-

sequence temperature has been high over North-Western India, and maxima exceeding 100° have been reported from several stations. The highest reading recorded during the week was 110·5° at Dera Ismail Khan on the 12th.

At 8 A. M. on the 6th, the small depression, the formation of which over the head of the Bay was noticed in last week's summary, had increased considerably in size and passed inland. It covered a region represented by the stations of False Point, Saugor Island, Calcutta and Burdwan, and was apparently moving north-westward. The wind circulation around the centre, though distinctly marked, was very feeble. The heaviest rain connected with this disturbance fell over Orissa. In Lower Bengal the amounts were very small, and in North and West Bengal there was none. The West Coast monsoon was blowing moderately strongly, and rain in small amounts was falling over the greater part of the Peninsula, the central parts of the country, and the North-Western Provinces. Slight rain was reported from the submontane parts of the Punjab, but in general that Province as well as Rajputana and Sind was without rain. There was a fair amount of rain over the Circars, where it was much needed. Temperature had generally fallen, but high maxima were reported from the Punjab and Sind. On the 7th the Chart showed that the depression had become much larger and more diffused. The central area of low pressure extended from Lower Bengal as far west as Raipur, and from Gopalpore as far north as Allahabad. The circulatian around it was feeble and irregular. Rain was reported from about the same regions as on the preceding day. The principal feature of the rainfall was the heavy showers at Delhi and in the North-West Himalaya. Temperature had again fallen over a large part of the country. On the 8th there was hardly any change in the distribution of pressure or the winds over India. The large diffused depression still occupied the same position, and light or moderate rain wes reported from the greater part of the country except the south of the Punjab and the East Coast. Nowgong (Central India) reported more than 5 inches, but the amounts in the North-West were less than on the previous day. On the 9th there was again very little change, but the rainfall area had contracted, and nothing more than scattered showers were reported from Upper India or from Madras. On the 10th the barometer had fallen over Northern India and risen over the Peninsula. In consequence the barometric gradient between the south and north had increased, but with this exception there was again very little change in the general distribution of pressure. The wind circulation was also almost unaltered. The Bay branch of the monsoon did not pass into Upper India, and hardly any rain, except on the hills, fell in that region. In Burma rain was fairly heavy, but elsewhere though general the rainfall was on the whole light. The Chart of the 11th showed that the low pressure area, recently noticed over Bengal and the east of the North-West and Central Provinces, was breaking up. There was a good deal of confused air movement within its area, and in Upper India the wind was light and variable. In most other places moderately strong monsoon currents were blowing, but on the South-West Coast an abnormal northerly breeze was reported. Rain was general, except in the North-West, and the amounts were again heavy in Burma. Temperature was rising steadly in the Punjab. On the 12th the low pressure area noticed above was still filling up, but was at the same time moving slowly west-north-westward up the Gangetic plain. There was again much confused air movement within the depression. A moderately strong monsoon current was blowing at the head of the Bay, and elsewhere the wind directions were fairly normal. Rain was again general except in the Punjab, Sind and Madras. At several central stations the falls were heavy.

The concluding table shows that the rainfall of the past week has been heavy over a considerable part of the country, and that, except in a few divisions even where a deficit is reported, the deficiency is not generally large or important. The largest deficiency is in Behar, where there has been hardly any rain compared with the normal average. Eastern, Central and Northern Bengal have also received considerably less than the average amount, though the deficiency is less than the Behar. The deficiency in these regions is due to their position with reference to the depression noticed in the previous part of the summary. During the whole time of the existence of this disturbance, easterly and northerly winds, which at this season of the year do not ordinarily bring heavy rain, prevailed over a large part of Bengal. The south and west of the Punjab had much less than their normal amount of rain. Over the whole of the Peninsula, except the West Coast, less rain than usual fell, and the same is true of Khandeish, the Berars and the west of the Central Provinces. Western Rajputana, Guzerat, Kathiawar and Sind also experienced deficient rainfall. All the other districts received ample rain. Burma, Assam and Orissa report an excess and the North-West and Central Provinces had much more than the normal amount. The West Coast districts had a moderate, and Rajputana (East) and Central India a slight excess. No exceptionally large falls are reported from any part of India during the past week. Cherrapunji had only 15 inches, and in other parts of North-Eastern India and the Eastern Peninsula there were no remarkable falls. In Orissa there was steady and rather heavy rain. In the North-Western Provinces and Oudh the maximum amounts reported varied generally between 4 and 8 inches. In the south of the Punjab, the maximum amounts were very small, but in the central and submontane parts of that Province, good falls, varying between 3 and 6 inches, were reported. In the North-West amounts were smaller, and in the west they were as small as in the south. In Mysore there was no heavy rain, and in the Konkan the maximum amounts were about normal. In the Deccan (except at Banda in the Kolapore district, where 18 inches of rain has fallen) Khandeish, the Berars, and the west of the Central Provinces there were no falls of importance, but in the Central Provinces (central and east) and in Central India there were several large falls. In the east of the Peninsula the rainfall was very light.

The concluding column of the Table shows an excess in the seasonal rainfall at twelve, a deficit at thirty-four, and no departure from the mean at two of the Meteorological divisions. There is hence still considerable and wide-spread deficiency in the monsoon rainfall of the present season, but except in parts of the Punjab, in Orissa, East Bengal, Mysore, Madras and Guzerat, the deficiency is not usually large.

T. ANANDA RAO,
*Deputy Commissioner.*

To the President, Mysore District Committee, Mysore Exhibition.

SIR,

I have the honor to report that as requested by you I held Mass Meetings in four places of the Yedatore Taluk, to explain the objects of the Exhibition and to invite influential merchants, ryots and artisans to contribute exhibits. I have no doubt that the more intelligent classes realize the advantages of the Exhibition both to themselves individually and to the General Public, but many of the ryots of out of the way villages have been exceedingly shy and backward. The reluctance to come forward has been much more worked with reference to cattle and live stock than as regards other exhibits. Much has been done by persuasion in personal conversation and general encouragement in various ways. It is very unfortunate that the rains have been persistently holding off. The havoc done by cattle disease last year has been very great. Saligrama was the best known place for draught cattle, but the finest pairs having succumbed to disease, only the second rate animals are available for Exhibition. Some minor difficulties have been brought to notice with regard to each class. Bulls for breeding (Class 1, 2, 3) are always left entirely free and wild to keep them in their best condition putting on the nose string and taming them will occasion a loss of condition which will materially tell against them. Milch cattle will suffer very much by the long journey. All cattle on the north side of the Cauvery have to swim across. Taking calves across the river is expensive and troublesome. As regards several kinds of grain only what remains of last year's crop has to be exhibited, which will be no adequate representation of the best produce. The season is likewise too early for tamarind which cannot therefore be of the best description. Raw tobacco cannot be exhibited.

In conclusion, I have to state that the contribution from this Taluk will consist mainly of grain (chiefly paddy) and draught cattle. I enclose an abstract of the Proceedings of each meeting. The statement of exhibits will be submitted by the Amildar before the 25th instant. I would request attention to some of the suggestions which are very good. Nothing would be more useful and necessary than a cattle and bandy stand fully protected and kept in sanitary condition, for visitors who will be very numerous.

The President explained in detail the objects of the exhibition and its advantages to merchants, agriculturists, vendors and purchasers, cattle breeders, artisans, &c., and proceeded to read out the Prize list. Intending exhibitors registered the description of their exhibits and a detailed statement was drawn up. The following suggestions were made :—

1. That prizes be given for asses.

2. That additional prizes be given for cardage, as cocoanut rope is a very useful article and deserves a prize for itself.

3. That additional prizes for matting of sorts, such as the useful and the ornamental, be given.

The Meeting closed with the reading of the Regulations of the exhibition and the general exhortation to the exhibitors to bring out their best and to sustain the reputation of the Taluk to which they belonged.

The following suggestion was made :—

That free passage across the Cauvery be provided for all exhibits, especially to cattle and live-stock, the ferrymen being remunerated at a lump sum by the Exhibition Committee.

Many of the exhibitors demanded this as almost a condition of their bringing exhibits.

### ADDRESS OF THE DEWAN OF MYSORE TO THE REPRESENTATIVE ASSEMBLY AT MYSORE, ON WEDNESDAY, THE 17TH OCTOBER 1888.

GENTLEMEN :—I am commanded by His Highness the Maharaja to lay before you to-day, a brief account of some of the more important results of the administration of the Province during the past official year, and, after doing this, to call upon you for any representations you may wish to make, either in the way of calling attention to any local wants or of suggesting any improvements in the administration.

In discharging the duty which thus devolves upon me, the subject that claims my first attention is Finance. Let me remind you, by way of preface, of what I said on this subject in my address last year. On that occasion I attempted to explain the progress of our Revenue during the past fifty years, and pointed out that the income realized in the year 1886—87, *viz.*, 127½ lakhs, was the highest in the financial history of the Province. That high figure was fully a rise of 13¼ lakhs from the previous year 1885—86, and now I am glad to be able to inform you that a still further improvement of about 2¼ lakhs has accrued during the past year.

With these preliminary remarks I proceed now to read the statements of Revenue and Expenditure under all heads except the Railway.

*Land Revenue.*—The most noticeable feature in the foregoing statement of Receipts is that the total Land Revenue amounted to Rs. 85,13,879 being Rs. 1,95,000 less than in the previous year. This decrease, however, was not due to any falling off either in the extent of land under cultivation or in the normal Land Revenue Demand for the year, as you will readily gather from the following figures :—

| | In 1886—87. | In 1887—88. |
|---|---|---|
| | Rs. | Rs. |
| Amount of previous years' arrears collected . .. | 17,95,141 | 12,95,967 |
| Amount collected on account of current year's Revenue Demand .. .. .. .. | 69,14,461 | 72,17,913 |
| Total amount collected .. .. .. .. | 87,09,602 | 85,13,880 |
| Amount of arrears at end of 1887—88 .. .. .. | | 13,65,461 |

You will see from these figures that the arrears collected amounted to 18 lakhs in 1886—87 and to only about 13 lakhs last year. Out of the difference of five lakhs, nearly three were made good by a better collection of the year's Revenue, thus leaving a net decrease of nearly two lakhs in the actual receipts of the year. Viewed in the light of the above figures, this decrease is no indication of any instability of this Item of Revenue, nor is there any ground for apprehending that the large collections of last year were in any way abnormal. And I may in this connection remind you that there always is a considerable balance remaining uncollected at the end of every year, as the official and agricultural years do not correspond. The actual Land Revenue Demand has stood at over 81 lakhs during the past two years, a fact which we may regard as a sign of the present satisfactory condition of this branch of our Revenue. It has been the result, in a large measure, of extension of cultivation in all parts of the Province, under the influence of improved irrigation on every side, improved communications by means of the Railway and new roads, and the beneficial operation of the Revenue Settlement now so near completion for the whole Province.

*Excise.*—The next important Item of Revenue is Excise. It shows a marked improvement from a financial point of view. The Receipts (exclusive of the Civil and Military Station) amounted to 15 lakhs, being 3¼ lakhs better than the 11¾ lakhs realized in the previous year.

The Arrack and Toddy contracts were renewed in the beginning of the last year, and advantage was taken of that opportunity to revise the rates of duty and selling price of arrack throughout the Province. The revised scheme is working with success and has contributed partly to the improvement of the Revenue from this source. When in the beginning of 1884—85 a partial revision of duty and price was effected, an increase of nearly one lakh was secured, and three years later, with the completion of the revision for the whole Province, a further increase of Rs. 2,24,000 has resulted. The duty is now made uniform throughout the whole Province, and is fixed at the maximum rate prescribed by the Indian Tariff Act. The retail price is fixed at Rs. 5 per gallon throughout the Province, whereas before the present contract that high rate prevailed only in the Bangalore City and Station, in the Mysore City and in the Towns of Shimoga and Chikmagalur. You will thus see that the selling price of arrack is now pitched much higher than it ever was, but even this has had no effect whatever in reducing consumption. Only a part of the increased Revenue now derived from arrack can be attributed to the higher duty recently adopted. Another part of this increase—though a very insignificant one—may be due to the precautions now taken to prevent adulteration, and to our close watchfulness against illicit manufacture in remote and secluded parts of the Province. But after making every allowance for these causes, there can be no doubt that a considerable part of the increased Revenue is due to a larger consumption. For, let us compare how consumption, as indicated by the Excise Revenue, has increased during the past few years. The Arrack and Toddy contracts were renewed in 1884—85 and again in 1887—88. As compared with 1883—84 the increase under Arrack was 22 per cent in 1884—85 and 74 per cent in 1887—88. Similarly under Toddy the increase was 28 per cent in 1884—85 and 46 per cent in 1887—88. Thus you will see that in 1887—88 the increased consumption of arrack was fully 28 per cent higher than the increased consumption of toddy. This excess in the rate of increase was probably due to the higher duty levied on arrack. Excluding therefore this increase from consideration, we still find a further and considerable increase common to both Arrack and Toddy, which we can only attribute to increased consumption. In my opinion, it is the result of prosperons seasons and good crops, and of the very great rise in the wages of labor which has taken place within the last few years. With extensive Railway Works between Gubbi and Harihar, with the large expansion of the Gold Industry in Kolar, and with Public Works of all kinds employing large numbers of coolies in every part of the Province, the demand for labor has, for some time past, been far in excess of the supply, and has led to the importation of a large miscellaneous class of laborers from outside the Province. The high wages earned by laborers of this class, as well as by those of the Province, account, in my opinion, for a great part of the increased consumption of both Arrack and Toddy.

With the increase of the Excise Revenue the Establishment has had to be slightly strengthened, and in the interests of better supervision there has been adopted a centralized system of manufacture and distribution, which at present is working with marked success, though it appears to labor under the disadvantage of not having a special Officer in charge of its administration. There is also another circumstance to which I wish to refer in this connection—namely, the large and unexpected rise in the price of jaggory during the last year. The cause of this rise has not yet been satisfactorily ascertained; but the rise itself is a matter to be contemplated with satisfaction as it means prosperity to the ryot, though it may tend to reduce the margin of profit left for the present Arrack contractors. What would greatly benefit the cultivator of sugar-cane as well as the manufacturer of arrack is the establishment of suitable sugar factories. With the important Irrigation Works now in course of improvement or construction, greater facilities, I am sure, will come into existence for the establishment of such factories in centres of large sugar-cane growing tracts in parts of the Mysore, Shimoga and Kolar Districts. Such factories, worked in connection with special licensed Distilleries under a system of free distillation, would be the means of establishing a highly remunerative industry in the Province. The stimulus, thereby afforded to the cultivation of so valuable a product as sugar-cane, would add materially to the wealth of the country, and His Highness the Maharaja's Government will be glad to extend to this industry their cordial support and every encouragement in their power.

Returning to the subject of last year's Revenue Receipts, I would add that interest on investments of surplus Revenue amounted to Rs. 1,08,000 and on current deposits in the Madras Bank to Rs. 37,000.

Other items of Revenue call for no special remark, beyond the general one that they have all maintained the prosperous condition attained in the previous year.

*Expenditure.*—The total expenditure of the past year (exclusive of the State Railway) was Rs. 1,13,98,000 as compared with Rs. 1,09,09,000 in the previous year. Increases have occurred chiefly under the following items :—

| | Increase. |
|---|---|
| Remuneration of Village Servants .. .. .. | 21,641 |
| Forests .. .. .. .. .. | 76,842 |
| Police .. .. .. .. .. | 43,409 |
| Public Works .. .. .. .. .. | 3,08,774 |
| Moiety of charges on account of His Highness the Maharaja's North India tour .. .. .. .. | 63,012 |
| Donation to Indo-Colonial Institute in London .. .. | 50,000 |
| Purchase of Tents .. .. .. .. | 28,415 |

The first of these items (remuneration of village servants) must keep pace with the progress of our Revenue Settlement. In the Forest Department, the increase has been unavoidable owing to extensive planting and the large areas newly brought under conservancy. Under Police, the increase was due to full effect being given to the re-organization scheme, explained in my address last year. The increase under Public Works was due to several large irrigation and other works being undertaken as will be fully explained hereafter. For many years past, no tents had been supplied to Executive Officers. A new supply was felt to be an urgent want and was partially met by purchases during the past year. The other items appear to require no special comment.

*Closing Balance.*—Deducting expenditure from Revenue Receipts, the surplus of last year amounted to Rs. 15,77,685. This was reduced to Rs. 14,74,369 by net *payments on account of the State Railway and the last named amount added to the total Revenue surplus on 1st April 1887 (Rs. 50,77,511) gave a closing balance of Rs. 65,51,880 on 31st March 1888.

| | Rs. |
|---|---|
| *Payments . | 3,81,566 |
| Receipts .. | 2,78,250 |
| Net payments | 1,03,316 |

*Budget Estimates.*—The revised Budget Estimates of Receipts (including the State Railway) amount to Rs. 1,26,93,471 against an actual collection of Rs. 1,32,54,526 in the past year. For this year, the estimate under Land Revenue is only 80¾ lakhs, though the actual Receipts amounted to over 85 lakhs last year ; but the estimate is based upon the Land Revenue Demand (exclusive of arrears) which, as already stated, was about 81 lakhs. Under Forests an increase of over ¾ lakh is expected, chiefly from sandalwood.

The revised Budget provides for a total expenditure of Rs. 1,25,05,047, being Rs. 7,24,890 more than the actual expenditure of the past year. The principal heads under which increased provision is made are :—

Rs.

4,20,000. Under "Public Works," the grant for the year having had to be fixed at 20 lakhs (against 16½ lakhs in 1887—88) owing to several large Irrigation works and two important bridges.

2,19,000. Under "Railway," as the extension to Harihar is fast approaching completion and provision has to be made for payment of interest on capital outlay.

75,000. Under "Forests," owing to extension of plantations and to increased felling operations required to meet the greater demand for timber of all kinds and for sandalwood.

and 41,000. Under "Medical," owing to the large number of new Dispensaries now being opened in every part of the Province, the object being that no Taluk Head-quarters should be without a Dispensary.

*The Mysore State Railway.*—Before concluding my remarks on the subject of Finance, you will naturally expect me to give you some definite information regarding the arrangement under which the State Railway is being managed and extended by the Southern Mahratta Company. A copy of the contract finally concluded with the Company having recently been received from the British Government, I shall first explain briefly the terms of this contract, and then touch upon its bearing on the finances of the State.

The contract has been concluded by the Secretary of State for India, acting on behalf of the Maharaja of Mysore, and it is to be in force for a period of 46 years from the 30th June 1886 to 30th June 1932. Under the guarantee of the Secretary of State, the Company have raised a loan of £1,200,000, and the proceeds of this loan (£1,224,000, including a premium of 2 per cent) has been

paid by the Company to the credit of the Secretary of State. The sum thus paid amounts in Indian currency to Rs. 1,63,82,801, and is intended to be devoted towards the capital cost of the Mysore State Railway, that is to say :—

| Rs. | |
|---|---|
| 68,60,508 | towards payment to the Mysore State of the actual capital outlay on the Mysore-Gubbi line up to 30th June 1886, and— |
| 95,22,293 | (or such portion of it as may be absolutely necessary) towards expenditure upon the construction and equipment by the Company of the extension from Gubbi to Harihar. |

The entire Railway from Mysore to Harihar is to be worked by the Company as a separate system, distinct from their Railways in British India, and the cost of management is to be apportioned between the two systems in the proportion of their respective gross earnings. Out of the net earnings of the Mysore system, the Company are to retain for themselves a quarter share, the remaining three quarters being handed over to the Mysore State. The loan of £1,200,000 raised by the Company is not redeemable before 1st March 1936, but is redeemable after that date upon a year's previous notice being given. Till such redemption, interest upon it at 4 per cent per annum is payable half yearly in London on 1st April and 1st October in each year. As the loan has been taken up upon the guarantee of the Secretary of State, acting on behalf of the Mysore State, there attaches to the latter the obligation to pay interest on it till its redemption. But you will, at the same time, note that there is no obligation whatever, either on the part of the Mysore State or the British Government, to redeem the loan at any time though it is optional to the British Government, and, through the British Government, to the Mysore State, to redeem it at any time after 1st March 1936. Under the terms of the contract, the management of the Railway will, on 1st July 1932, be surrendered by the Company to the Secretary of State acting on behalf of the Mysore State, and from the date of such surrender, the State will be entitled to work it in any way it deems proper. You will thus see that the arrangement in regard to our State Railway is divisible into two distinct parts which have no necessary connection with each other. First, the State has the obligation to pay interest on the loan and the option to redeem it in due time, and secondly, the Company has the obligation of constructing and managing the Railway for a specified term of years and the right to receive as remuneration for such service a quarter of net earnings during such term. I am sure you will agree with me in thinking that this remuneration to the Company for 46 years is not too great a price to pay for the construction of an important Railway with the aid of foreign capital.

The sum of Rs. 68,60,508 being capital cost of the Mysore-Gubbi line up to 30th June 1886, has been paid to the credit of Mysore, out of the capital raised by the Company ; and the same has been applied towards the partial liquidation of the famine debt due to the British Government, with effect from 1st July 1886. Since then, two payments of 4 lakhs each have been made by the State towards this debt, which will be completely liquidated by the payment of Rs. 1,99,404 in December next, when the annual payments of 4 lakhs hitherto made on this account will determine.

It is however our intention to continue similar payments and to set them apart towards a special fund for the redemption as well of the Local Railway Debenture Loan of 20 lakhs as of the English Debenture Loan of £1,200,000.

In addition to these payments of 4 lakhs per annum, we have to meet the guaranteed interest on the last named loan. During construction, however, we are only called upon to pay interest upon capital actually spent from month to month. Eventually, we have to pay interest on the whole loan amounting to £48,000 per annum, which, according to average rates of exchange, will probably be about 5¾ lakhs of rupees. When the working of the Railway is fully developed—as I hope it will be within the next few years—about 4½ lakhs per annum may be expected as ¾ths of net Railway earnings due to the State, and deducting this amount from interest payable by the State, the net annual payment to be made to the Company, under the contract, would be about 1¼ lakh per annum. Much larger net annual payments varying from 3½ to 2 lakhs will, however, be necessary in the next five or six years, during the infancy of the Railway when net earnings would be necessarily low, and I have only to add that the Government have made an accurate forecast of the various liabilities above explained, and expect to be able to meet them in due time.

As regards actual construction of the extension from Gubbi to Harihar, you will be glad to learn that the works are all being pushed on with vigor by the Company. Progress, however, has not been as good as was anticipated between Gubbi and Birur, owing to the insufficiency of local labor, and this portion of the line will probably not be opened for traffic until the next official year. Works along the northern sections are, it is understood, rapidly approaching completion and it is believed that from Harihar to Kadur, the line will be opened for traffic during the course of the next few months. I am unable to state yet what the total cost of the new line will be, but the Government of India have issued strict orders that a limit of 80 lakhs should not be exceeded between Gubbi and Harihar and we may therefore assume that the total cost of the Railway from Mysore to Harihar will not exceed Rs. *1,48,60,000, especially as it has been decided to relieve Mysore of a moiety of the cost of the Tungabhadra bridge at Harihar, which it was at first proposed to debit against the Harihar extension.

| Rs. | |
|---|---|
| *68,60,508 | already spent by Mysore on Mysore to Gubbi, |
| 80,00,000 | now being spent by Company on Gubbi to Harihar. |

It will interest you to know that a scheme is now under discussion to extend the Mysore Branch as far as Nanjangud and thence on to Gudalur at the foot of Neilgherri Hills. Whether such a line, of incalculable benefit to our most Southern Taluks, will eventually take precedence of that proposed to connect Bangalore with Hindupur or Seringapatam with Arsikere *viâ* Hassan, it is as yet impossible to say. Meanwhile the traffic on our open line, I am glad to say, continues to increase slowly but steadily and there can be little doubt that the early opening of the line as far as Harihar will give an immense impetus to our commercial progress all over the Province.

*Public Works.*—And now I turn to that part of our Public Works policy in which the majority of the community are most keenly interested—I refer to Irrigation. The object and scope of our policy on this subject are fully illustrated by our Public Works Budget for the current year, to which I request your careful attention.

You will observe therefrom that, towards Public Works of all kinds, we have made from the Provincial Revenue a grant of twenty lakhs of rupees, a proportion of our resources which—other claims and services and our general financial position considered—must be taken as most liberal. This grant is swelled by the addition of Rs. 5,29,000 from District Funds, Rs. 2,00,000 from the Provincial Irrigation Fund and Rs. 92,000 from Local Funds General, so that there is 28¼ lakhs of rupees available for works of all kinds in the current year. Civil Buildings, Communications, Public Improvements and Establishments necessarily absorb a large proportion of the total grant; but there remains about 9¾ lakhs to be devoted solely to Irrigation works. Of this large sum, about 8¼ lakhs are given to purely original works, that is, to altogether new Tanks and Channels, or to the improvement, enlargement or extension of those already existing so as to increase their irrigating power. The remaining 1½ lakh is necessarily absorbed in the maintenance and repair of old works, that is, to keeping them in efficient working order and preventing deterioration.

If you look into details, it will be seen that 200 old tanks are now under restoration or will shortly be so, in other words, are being enlarged or improved; that the irrigation from 25 others is being extended by adding to their catchment areas by means of artificial feeders or by perfecting and extending their distribution channels: that 12 altogether new tanks of large capacity and 10 new anikats are being built: that such important channels as the Rajaparameswari, the Maddur, the Ramasamudram, the Anandur, are being greatly improved and extended: that the Rampur Channel is being entirely remodelled: whilst most important extensions to the Virjanadi, the Hulhalli, the Kalhalli, the Ramaswami, the Mandigherri, and the entire restoration of the old and long abandoned Mahdapur anikat and channels (or as an alternative the extension of the great Sriramadevara Channel) will very shortly be in hand. And the amounts of the estimates as detailed in the Budget, ranging as they do from Rs. 5,000 to 3 lakhs and upwards, will indicate the importance of all these works. This, you will observe, is no insignificant programme as regards irrigation.

Further if we compare what is now being done with what was done during previous years, there is evidence of very marked progress. In 1881—82, the outlay on irrigation works and repairs was but—

| | | |
|---|---|---|
| | Rs. | 3,28,368 |
| In 1882—83 .. .. .. .. | „ | 2,85,297 |
| In 1883—84 .. .. .. .. | „ | 3,54,189 |
| In 1884—85 .. .. .. .. | „ | 3,41,520 |
| In 1885—86 .. .. .. .. | „ | 4,54,145 |
| In 1886—87 .. .. .. .. | „ | 5,98,628 |
| In 1887—88 .. .. .. .. | „ | 7,14,277 |

and in this year, if we can only get over the labor difficulty which threatens, we hope to spend over 9½ lakhs.

But it may be asked what actual addition to the irrigated area of the Province, will be made by the works executed during the last few years and those now under execution. Inasmuch as during the years immediately succeeding the Rendition, but very few original works were undertaken and as it will take time before definite results are realized from those of the last few years, it will be best for me to answer this question by giving for each District the approximate quantity of additional water that will be stored in ordinary years when all the tank works begun since April 1885 and those included in our Current Budget are completed.

A unit of water being what is required for the irrigation of an acre of land, this represents the addition of over 23,000 acres to the hitherto existing tank irrigated area of the Province.

Taking again our channels, and making a fair allowance for those extensions budgetted for, but which have not yet been worked out in full detail, I find that the following additional acreage will be brought under irrigation in the next five years : —

| | | Acres. |
|---|---|---|
| Ramaswami | Channel ... ... ... ... | 3,000 |

I exclude from this list channels which have been taken up or which it is proposed to take up, but of the revenue results of which there are doubts. I allude to the Talkad Channel, the Saligram and such minor channels as the Solur, the Sowlanga, the Yagati, *Ghirzai, &c., of which it is difficult at present to estimate the ultimate results.

*The anikats across the Veda and the Avati.

I informed you last year that those projects brought to notice by the members of this Assembly were invariably investigated with care, and sanction given in due course to those which on examination proved remunerative or useful. The same course will be pursued hereafter, but as the investigation of the proposals takes up much of the time and attention of our Engineers, I would take the liberty of asking you carefully to weigh the feasibility and utility of every project before submitting it for the consideration of Government.

I have before me now a list of the proposals brought forward by the members of the Assembly of 1887. These embraced 10 tanks, 10 anikats, 6 channel extensions, 8 tank feeders, 7 bridges and 7 roads. I may state at once that it would greatly lighten the work of our Engineers if proposals for local roads, believed to be desirable, were first laid before the Local Fund Boards who are fully empowered to deal with the same and who have the best means of judging of their utility or necessity. The new roads under reference, I believe to be more or less useful, but it is best to leave them to be dealt with by the Boards as funds become available, direct action on our part in regard to them not being desirable. The same remark applies to minor bridges which are chargeable to District Funds and for which State help is not called for. As regards the large and important bridges, those for the Tunga and Bhadra have already been sanctioned, and it is hoped that in the course of the next few years, bridges across the Cauvery at Yedatore and the Hemavati at Holé-Narsipur will be taken in hand. A bridge across the Cauvery at Bannur will not be required for many years to come, and a bridge at Yedatore will supersede the necessity for bridges at Ramanathpur, Tippur or Hampapur. Of the irrigation works proposed, several have been found either impracticable or unremunerative. Those that promise well are already in hand or will be so ere long. A list, with remarks regarding each work brought forward in this Assembly last year, is now available for any member wishing to examine it.

*Tank Maintenance.*—In my remarks of last year, I alluded at some length to the scheme inaugurated in 1886—87 and now being gradually worked up which aimed at the enforcement of the ancient custom of maintaining our tanks by the agency of the ryots themselves. Towards the close of the year it unfortunately happened that opposition to this measure in some Districts, instigated by a few disaffected or ill-advised persons, became so keen that it was found advisable to enjoin on the District Officers concerned absolute abstention from pressure of any sort. Conciliatory means were to be adopted to bring over the ryots to cordial co-operation, to make them understand that the measure, a mild one in reality and one always recognized, was solely intended for their own ultimate benefit—that sooner or later without their direct assistance in maintaining the earthwork their tanks must be ruined. In some parts, I regret to say, this has not yet had the desired effect, but in other places a most promising measure of success has been attained. I may quote as examples the Dodballapur and Nelamangala Taluks where a considerable quantity of earthwork has already been carried out by the ryots, Government contributing masonry and stone work. In the Shimoga and Shikarpur Taluks of the Shimoga District, the ryots have evinced a most praiseworthy spirit of co-operation, and many tanks have been put in order, which, but for such co-operation, must have remained in disrepair for many years to come ; whilst in some Taluks in Mysore, Hassan and Chitaldroog there are many tanks now under repair by the villagers themselves. I hold that, with tact and perseverance on the part of all Revenue Officials, and with care in selecting such tanks only as directly benefit the cultivating ryot,

the example already set in some Taluks of the Province will soon be followed throughout all the Districts. I cannot too forcibly impress on you, as representatives of the people, the necessity that exists for the ryots assisting Government in this matter, not only by fully maintaining those tanks already restored, but by contributing their labor to the restoration of the vast number of tanks all over the country now in disrepair and which it is absolutely impossible for Government to deal with without such assistance.

As regards roads, bridges and works of public improvement, I need only say this year, that the same policy of advance as was indicated last year is being steadily pursued. We are bridging over unbridged rivers, improving our old lines of communications, and extending new lines according to requirements. Our grants towards these works are so liberal, that there is every hope that before many years elapse, Mysore will be in regard to roads and bridges, on a par with the foremost Provinces of India.

I now come to make a few remarks upon some of the special questions referred to in last year's address.

*Kodagi Inams.*—The revision of the Kodagi Settlement, in which the people of the Kolar District take so keen an interest, is under progress in accordance with the promise given last year. In response to the Inam Superintendent's Notification, 261 applications for revision have been received. The principles laid down for the conduct of the revision are :—

1stly, That no Kodagi Inams shall be treated as granted only for "up-keep" unless this is most clearly and directly proved ;

and 2ndly, That the general rule of interpretation shall be that all Kodagi Inams were granted for *construction and up-keep* and not for *mere up-keep.*

You will thus see that a settlement based on these instructions will bring several Inams now settled under Class II, under the more liberal Class I ; and the Government of His Highness the Maharaja are disposed to think that this arrangement would exhaust all reasonable complaints or nearly all. It is believed that, in the large majority of cases, the Inamdars would prefer the payment of $\frac{1}{4}$ or $\frac{1}{2}$ quit-rent to the risk of entire forfeiture in cases of failure to keep up the tank to the requisite Government standard ; for, the revival of the Kodagi tenure would, as a matter of course, be burdened with that just condition. Colonel Grant has, however, been asked to make a note of all applicants who may desire the restoration of the Kodagi tenure with the old liabilities and submit the cases for further consideration and decision.

I need hardly mention that Inamdars who have spent money on their tanks relying upon the orders issued in 1881 will receive just compensation at the re-settlement.

*Inamdars' Toddy Revenue.*—The subject of Inamdars' claims to the Toddy Revenue was discussed last year. The set of draft rules, on which I then invited you to express your views, have not yet been adopted by Government. The information received from the Districts regarding the amount of revenue involved being incomplete, it has been deemed expedient to defer action in regard to the rules in question, till the expiry of the present Toddy Contracts, that is till 31st March 1890. In the meantime the existing rules will continue to be in force and will be duly carried out by the District Officers. This decision would be just to all interests concerned. The present contractors took up their contracts on the distinct understanding that the existing rules would remain unaltered during the term of their contract. What particular Inamdars are entitled to the Toddy Revenue was a question that was settled at the late Inam Settlement, and the decision then recorded will of course be strictly adhered to, and the claims of Inamdars entitled to the Toddy Revenue under that settlement will be adjudicated upon and duly enforced in accordance with the Orders of 1873, 1877 and 1881 and para V of the Conditions attached to the present Toddy Contracts.

*Forests.*—The next subject to which I would request your attention is the Forest Department which has continued to yield satisfactory results, both financially and otherwise.

During the past year, several State Forests were extended and a large number of valuable jungle tracts in varying stages of denudation, were brought under proper conservancy.

Fuel supply threatens to be the great problem of the future. The Railway extension to Harihar, the advancing Kolar Gold Industry, the Cotton and Wollen Mills at Bangalore and a rising population with expanding cultivation tend to enormously increase the demand for fuel and to diminish the source of its supply. There has thus arisen the necessity for carefully conserving as large and as many jungle tracts as possible, more especially those in the vicinity of the Railway.

The spontaneous growth of timber in forests and of fuel in reserved jungle tracts, is being supplemented by plantations on an extensive scale, and the Plantation Branch of the Forest Department planted during the past year about 4 lakhs of timber trees and $4\frac{1}{2}$ lakhs fuel trees, on an aggregate area of 1,481 acres or nearly $2\frac{1}{3}$ square miles.

Besides these regular plantations by Departmental agency, plantations of timber, fuel, fruit and sandal trees, have been started in several Taluks under the direction of the Revenue Officers : and the cheap and efficient system of sowing the seed broadcast upon waste land after a through ploughing, has, wherever earnestly tried, yielded striking results.

Sandalwood has, as usual, continued to yield a large portion of the Forest Revenue. Every attention is being given to sustain a perpetual supply of this valuable wood. Large tracts, with a good growth of sandalwood, have been formed into sandal preserves and have been brought under a system of protection, while the artificial reproduction of the tree is being carried out on a definite system.

In thus conserving forests and sandalwood tracts, the Government has not been unmindful of the necessities of the ryots in the matter of grazing and, well aware that a good breed of cattle constitutes the chief wealth and prop of our agricultural community, they have conceded to some extent the privilege of grazing in reserved forests, at certain seasons and in certain parts, on payment of a small fee.

Connected with forests there are now before Government two questions of some importance. The first of these is the free grant of wood for certain public purposes, and to ryots for cattle sheds, and, in exempted Taluks, also for building purposes. The second relates to the grant of land on favorable terms, for private plantations. The draft rules, which the Government propose to issue on both these subjects, will be circulated among you, and I shall be glad to receive any practical suggestions you may wish to make regarding them.

I may here add that steps are being taken to organize Khedda operations in July next in the Chamarajnagar Taluk, and from the experience to be thus gained, it is hoped subsequently to extend operations to other suitable localities. A successful capture is not only a source of direct gain to Government but a great public boon in localities where so much damage to crops is annually caused by wild elephants.

*Education.*—The progress of education throughout the year has been most satisfactory, and there are, on every side, evidences of an eager desire to take advantage of the means of instruction and that not only in large and populous towns but also in remote and secluded villages. In the last two years the numbers under instruction have increased by over 20 per cent.

Of the Taluk Schools as many as 40 per cent contain each from 100 to 330 pupils. The larger Hobli Schools, in which the attendance approached or exceeded 100, were converted into Taluk Branch Schools, and the levy of fees, which this step involved, has been readily accepted by the people, a decided indication of popular interest in education. To some extent this development of the Vernacular Schools may be attributed to the influence of the Mysore Local Examination, which has thus proved itself well adapted to the needs of the country. The thanks of the Government are due to the numerous private donors who have spontaneously come forward with offers of prizes and gifts for the successful candidates.

The English Middle and High Schools are every year improving in efficiency, especially those at District Head-quarters ; and higher education is well provided for by the existing Colleges which continue to be maintained at a high standard of efficiency.

The Mysore Scholars going through courses of professional instruction at Poona and Madras have acquitted themselves with credit. This is especially the case with the Engineering Scholars at Poona where two Mysore students took the first and second places respectively at the last L. C. E. Examination and thus become entitled to both the guaranteed appointments in the Bombay Public Works Department. The Mysore Engineering Students at Poona waited upon His Highness the Maharaja when he visited Poona in last February. His Highness was much pleased to hear of their progress and addressed them a few words of gracious encouragement.

Female education continues to gain in popularity and the good influence exerted by the success of Her Highness the Maharani's Girls' School at Mysore has led to the establishment of additional Schools on a similar system in other places. One has been opened at the important town of Melkote and another, founded to commemorate the Jubilee of the QUEEN EMPRESS, has been established at Tumkur.

Desirous that no class should be left behind in the Educational race, the Government of His Highness the Maharaja have, during the past year, instituted a system of special scholarships for the benefit of the Pallegar pensionaries of the State, and for Mahomedans. The former are designed as inducements to the principal Pallegar houses to put the younger members of their families under suitable courses of instruction with a view to qualifying them for the public service. The Mahomedans who have not hitherto come forward, as freely as could be wished, to avail themselves of the benefits of higher education have been given every encouragement by the institution of special scholarships.

In the Department of Archæology, nine Taluks were surveyed during the year and over 1,000 inscriptions added to the collections previously made. Good progress has been made with the volume of Jain inscriptions at Sravanabelagula. (Also more than a half has been printed of the great grammatical work, the Karnataka Sabdanusasanam and its commentaries, as well as of the Vikramarjuna Vijaya of the poet Pampa.)

In order that the results of the present survey may be exhibited in a more tangible form, it is proposed that a portion of the Victoria Jubilee Institute, now under erection at Mysore, should be set apart as a Hall of Inscriptions. Here will be collected, selected specimens, which will be built into the walls, systematically arranged in chronological order. They will thus not only form permanent records, but be available for reference and study as original standard authorities, for the forms and style of the language, at the periods to which they respectively belong, an object of high educational value.

The next subject which demands our attention is the constitution of this Assembly. I drew your attention last year to the rules prescribed on the subject. These rules have been emphasised in the orders of Government issued this year. It was found on an analysis of the classes to which the members of the last year belonged, that the property qualification, on which the selection of the majority of the members should depend, was not sufficiently attended to ; and in some of the Districts—Kolar, Mysore, Tumkur and Bangalore—the land-holders were not those who paid the highest assessment. It is the wish of His Highness' Government that the largest land-holders should as a matter of course be invited to this Assembly, excepting of course such of them as happened to labor under any special disqualification, and particular attention was accordingly directed to this point in the nominations made this year. The Deputy Commissioners were also requested to personally attend to the selection of members. I need hardly explain to you that His Highness' object, in insisting upon these conditions, is that the landed interests in the country should be represented in this Assembly by men possessed of high local influence, with devotion to public good, and independence of character. It is His Highness' intention to have a standing list of the highest land-holders in the Province, and, as it is not possible to get all of them to attend these meetings in every year, to make an annual selection from such list either by rotation or some other principle of exclusion.

Gentlemen,—I informed you last year of the visit which His Highness the Maharaja proposed to pay to His Excellency the Viceroy in Calcutta. That visit was paid in January last with the happiest results. His Highness took that opportunity to visit other places of note as well, among others the capitals of two of the principal Rajput States—Jeypur and Jodhpur—and the capital of his friend the Maharaja Gaikwar. He was everywhere received with great consideration and respect and was especially touched by the fraternal regard and affection which marked his treatment at the courts of his brother Native Chiefs.

Gentlemen, in conclusion it only remains for me now to call attention to the Agricultural and Industrial Exhibition, now being held in our midst. His Highness the Maharaja's object in holding it in this City and at this time of the year, has been to afford you special facilities for visiting it. It gives you an opportunity for comparing the agricultural capabilities of your respective Taluks with those of other places, for informing yourselves of the success that has been attained in various parts of the country in improving the breed of cattle and for obtaining some practical idea of the extent to which manual labor can be saved, by the employment of suitable machinery for lifting water for irrigation purposes, and for other operations connected with agriculture. His Highness is deeply sensible of the valuable advantages which the Agricultural, Industrial and Commercial interests of the Province will receive from Exhibitions such as the present, but, their success depends upon your practical appreciation of their usefulness. And it is therefore His Highness' earnest hope that you may be able to derive useful information on the various sections of Agriculture and Industry now represented and that when you return to your homes you will, by your example and influence, contribute to the best of your ability towards the realization of the objects of this Exhibition.

## WEATHER SUMMARY FOR AUGUST 1888.

*Simla, 3rd September* 1888.

Meteorological conditions during August are generally similar in all important respects to those of July. Both branches of the monsoon usually blow steadily throughout the month, and in several districts in India the rainfall of August is larger than that of July. Monsoon storms are also about as numerous in August as in July, but temperature as a rule is lower in the latter month. The principal points of difference between the weathers of the two months are, a general decrease in the force of the monsoon currents all round the coasts, and a slight but noticeable fall in temperature, more particularly towards the end of the month.

During the past month strongly marked monsoon conditions have prevailed throughout India, and the rainfall has been heavy and general. On several occasions during the month rain has been reported from almost all parts of India except the Carnatic and the Indus Valley, and on some occasions the rainfall, around the small cyclonic storms which passed across India during the month, was exceptionally heavy.

On the 1st typical monsoon conditions prevailed over India. Pressure was highest in the extreme south and lowest over the Indus Valley, while a trough of low pressure lay over the Gangetic plain and the northern parts of the Central Provinces. Both branches of the monsoon were blowing fairly strongly, and, except in the extreme North-West, the rainfall was very general. There were, however, no very heavy amounts, the largest being 2¼ inches at Hazaribagh and 2 inches at Jeypore. After the 1st the trough of low pressure over the Gangetic plain became less strongly marked and the influx of moist monsoon winds into Upper India less strong, so that the rainfall of the Punjab, Rajputana and the west of the North-Western Provinces decreased. These conditions lasted until the morning of the 6th, when a small depression was formed over the north-west angle of the Bay and the South-West Bengal, and rain again became general in Upper India. This depression never assumed any importance, but became very diffused as it travelled inland on a westerly course. It was, however, accompanied by much general rain in nearly all parts of India, the principal falls of the 6th and 7th being 6¾ inches at Roorkee, 4½ inches at Delhi, and about 4 inches at Simla and Chakrata. On the 8th and 9th the depression was still present, but the rainfall though general was lighter. On the 10th rain ceased in North-Western India and temperature rose quickly. On the 11th there was general and in places heavy rain over the Peninsula, the central parts of the country and Burma, but in North-Western India fair weather and a high temperature continued. Between the 12th and 16th there was very little change, general rain falling except in the North-West, where several stations reported fair and rather hot weather. On the 17th a slight barometric depression was shown over Bengal, to the west of which, *viz.*, at the stations of Hazaribagh, Gya and Benares, the rainfall was very heavy. This depression travelled slowly westward, reaching Sutna on the 18th, Jhansi on the 19th, Neemuch on the 20th, and Lower Sind on the 21st. During the whole of its progress across India it gave very heavy rain to the stations within or near its line of march.

No sooner had this depression filled up than another appeared at the head of the Bay. At 8 A. M. on the morning of the 22nd the centre lay near Saugor Island, where 4 inches of rain had fallen. This depression became rapidly deeper, and by the morning of the 23rd had become a very strongly marked storm; very heavy rain was falling in Orissa and a strong cyclonic circulation prevailed around the centre. Rain was very general elsewhere and was heavy in parts of the Punjab. By the 24th the disturbance had reached the neighbourhood of Burdwan and a gale was blowing over Lower Bengal. Fourteen inches of rain had fallen at Saugar Island, 5 inches at Calcutta, and largish amounts in several other parts of the country. On the 25th the disturbance lay to the west of Berhampore and had apparently begin to fill up. On the 26th the centre had to a large extent filled up and the rainfall in its neighbourhood was only moderate. In North-Western India the weather was fair and generally rainfall was decreasing. The Chart of the 27th showed that the disturbance had suddenly undergone redevelopment, and 8½ inches of rain was reported from Gya (of which 7½ inches fell between 6 P. M. of the 26th and 10 A. M. of the 27th), 3½ at Patna and 2¾ inches at Purneah, but after this effort the disturbance broke up and by the 29th had quite disappeared. On the 30th and 31st the most important feature of the weather was reported from the West Coast, where the monsoon current showed strong signs of falling off.

The temperature changes of the past month have been considerable in the Punjab, Guzerat and Sind, but elsewhere the heat has been fairly uniform throughout and about the average of the month. For the first six days the maxima were high, varying between 100° and 113°, in North-Western India, but after the 6th the thermometer fell, at first quickly, and the heat became moderate and continued so until the 22nd, when the weather became cool and remained so till the close of the month.

The table of rainfall at the end of the summary shows that the total fall during the month was deficient in the Western Panjab, the Trons-Gangetic portions of the North-Western Provinces, Northern Bengal, the Berars and Khandeish, Sind, Guzerat, the Deccan, Mysore, the Carnatic and Ceylon, and was in excess elsewhere. The only important deficiencies were reported from the Berars, the Deccan, Mysore and Ceylon, the falls elsewhere being only slightly below the average. The greatest excess was in Behar, but in Lower Bengal, Chutia Nagpur, Rajputana, Central India and Lower Burma the average was very largely exceeded.

The following table shows the amount of rain and the difference from the average during the month of August 1888, according to districts, as far as is indicated by the telegraphic reports :

*Circular.*

Attention has been recently drawn to a practice prevailing in certain districts of using sugar or jaggory and oil in the curing and tanning of skins and hides. This practice is described as pernicious commercially, inasmuch as buyers must, in their own interests, offer lower prices for, or refuse to purchase at all for the Europe market, skins and hides which on arrival there may turn out to be of inferior value in consequence of being thus artificially weighted. The use of such materials is wholly unnecessary for curing or tanning skins and hides and can only be used to make them appear heavier than they really are. Their presence is, however, easily detected by chemical analysis, a process to which Indian consignments appear to be now subjected on arrival in Europe. A persistence in the practice can only result in the serious contraction, if not the total extinction, of the trade, and tanners are invited, in their own interests, to stop a practice a continuance of which may cause them serious injury financially.

*Circular.*

Attention has been recently drawn to a practice prevailing in certain districts of using sugar or jaggory and oil in the curing and tanning of skins and hides. This practice is described as pernicious commercially, inasmuch as buyers must, in their own interests, offer lower prices for, or refuse to purchase at all for the Europe market, skins and hides which on arrival there may turn out to be of inferior value in consequence of being thus artificially weighted. The use of such materials is wholly unnecessary for curing or tanning skins and hides and can only be used to make them appear heavier than they really are. Their presence is, however, easily detected by chemical analysis, a process to which Indian consignments appear to be now subjected on arrival in Europe. A persistence in the practice can only result in the serious contraction, if not the total extinction, of the trade, and tanners are invited, in their own interests, to stop a practice a continuance of which may cause them serious injury financially.

*Circular.*

Attention has been recently drawn to a practice prevailing in certain districts of using sugar or jaggory and oil in the curing and tanning of skins and hides. This practice is described as pernicious commercially, inasmuch as buyers must, in their own interests, offer lower prices for, or refuse to purchase at all for the Europe market, skins and hides which on arrival there may turn out to be of inferior value in consequence of being thus artificially weighted. The use of such materials is wholly unnecessary for curing or tanning skins and hides and can only be used to make them appear heavier than they really are. Their presence is, however, easily detected by chemical analysis, a process to which Indian consignments appear to be now subjected on arrival in Europe. A persistence in the practice can only result in the serious contraction, if not the total extinction, of the trade, and tanners are invited, in their own interests, to stop a practice, a continuance of which may cause them serious injury financially.
